# Leak Detection

**NOAH**

Multifamily and commercial buildings require reliable and efficient leak detection to maintain the integrity and efficiency of their systems. Kairos Water's intelligent leak detection technology helps protect these buildings from water leaks and the associated costs and damages. Our advanced system uses machine learning to continuously monitor and identify potential issues, providing a proactive approach to maintenance and ensuring that organizations can address potential problems before they become major issues.

## PROPERTY COST SAVINGS

Our advanced leak detection technology helps organizations save money by identifying and addressing potential issues before they cause significant damage or increase water usage.

## DAMAGE PREVENTION

By proactively identifying and alerting maintenance staff to potential issues, our technology helps prevent costly property damage and downtime.

## SAFETY & LIABILITY REDUCTION

By addressing potential hazards before they become a problem, our technology helps organizations reduce safety risks and liability.

# Protects Against :

- Water leaks and property damage
- High water usage and associated costs
- Safety hazards and liability for the organization
- Downtime and lost productivity due to property damage or maintenance issues

# Why Choose Us :

- Patented asset protection system built for commercial applications.
- No Kairos customer has filed a water damage claim post-installation.
- Average 6 month ROI; ROI always achieved within 12 months.
